EXPERIENCE

Software Engineer | LTM | Hyderabad | June 2024 – Present

- Engineered and maintained scalable Java Spring Boot microservices and RESTful APIs for core banking platforms, enabling secure and efficient processing of high-volume transactions for millions of users.
- Redesigned MySQL database schemas and refined SQL queries with advanced indexing strategies, boosting query performance by 30%.
- Built 15+ multithreaded REST APIs and multiple microservices from scratch using Java, Spring Boot, Spring Security, and Spring Data JPA.
- Delivered high-performance Spring Boot REST APIs for payment status processing, achieving 100 ms average latency.
- Streamlined development workflows using AI-powered tools, accelerating feature delivery by 60%.
- Enforced secure authentication using JWT, strengthening application security and backend reliability through robust error handling.
- Partnered with cross-functional teams to deliver features, resolve production issues, and align technical solutions with business objectives.
- Enhanced MySQL database performance and API efficiency through query tuning and indexing, achieving 38% faster response times.
- Scaled system performance by 3X throughput improvement using caching strategies, thread optimization, and efficient multithreading techniques.
- Documented REST APIs with OpenAPI and utilized WireMock for robust inter-service testing, improving test coverage and reliability.
- Integrated JWT and OAuth 2.0 for secure authentication and authorization in Spring Boot applications and third-party integrations.

PROJECTS

SecureRoute

- Built a secure API Gateway using Spring Cloud Gateway MVC with Keycloak, enforcing centralized authentication and role-based authorization across 10+ microservices.
- Optimized database access using Spring Data JPA and custom queries, reducing data fetch latency by 20% and improving overall system reliability.
- Utilized GenAI tools to auto-generate mock payloads and API documentation, significantly reducing manual QA effort and improving testing efficiency.
- Designed and implemented a secure, high-performance API Gateway using Spring Cloud Gateway, integrating Keycloak for centralized authentication and authorization across microservices.
- Improved system resilience using Resilience4j for circuit breaking and integrated OpenTelemetry for distributed tracing and observability.

EDUCATION

Netaji Subhash Engineering College

Bachelor of Technology (B.Tech) | CGPA: 8.7/10.0

August 2019 – June 2023

Kolkata, West Bengal

SKILLS

Languages: Java, SQL, JavaScript (React.js)

Frameworks: Spring Boot, JPA/Hibernate, React.js, Spring MVC, Microservices

Tools: Kafka, Redis, AWS (EC2, S3, Docker), MySQL, Git, Postman

Core Areas: Java Development

Concepts: OOP, SOLID Principles, Multithreading, Event-Driven Architecture, Exception Handling, Data Structures and Algorithms

Soft Skills: Problem-Solving, Critical Thinking, Teamwork, Strong Communication, Adaptability
